

Dear Customer,

Computer Perfect – Upcoming Technology Infrastructure Upgrade

Since our inception, we have strived to keep the Lightning Online POS Platform current and in step with changes in technology to support our growth and the expanding needs of our customers. A recent fire at our data center underscored the strategic importance of enhancing our infrastructure to provide even greater security and reliability.

In the coming weeks, we will be moving our platform infrastructure to the Microsoft Azure data centers. Azure is one of the world's leading cloud computing platforms owned and operated by Microsoft. It offers access, management, and the development of applications and services through global data centers. Through this change we expect to achieve:

1. Improved Operational Stability
2. No space Limitations
3. Increased computing Power
4. Better scalability.

An official date has not yet been set, as we have been performing extensive background work to get to a point of readiness before the final push. We will notify you a week in advance of implementing this upgrade, via an email blast and numerous Lightning pop-up messages at log in. Please note that Lightning will not be accessible during the upgrade process which will start at 11 PM Eastern Time and is expected to be completed by 6 AM Eastern Time.

We are pleased to continue our long-standing commitment to invest in our technology and platform to bring the best possible service to our customers. Thank you for your business and loyalty to The Lightning Online POS Platform.
